

JCOIN Common Measure Specifications

Baseline Staff Measures

Revised 3/4/2020

This document provides the specifications for core and optional JCOIN measures. Optional questions are highlighted in yellow; the rest are considered core items. Note that this document is a collection of measures; it is not a survey or an instrument. JCOIN Research Hubs should integrate these measures into the other data collection processes for their study protocols. Separate documents cover follow-up measures for staff and baseline/follow up measures for participants.

ORGANIZATIONAL READINESS FOR IMPLEMENTING CHANGE (ORIC)

[baseline only]

INSTRUCTIONS: Hubs using this measure should substitute a short-hand name for their intervention/program into each item, in place of "[intervention]." Please check to be sure it makes sense for every item. If necessary, define the intervention at the beginning of this section. For example, something like, "This agency is involved in a study that is testing whether peer navigators are effective at linking justice-involved clients with healthcare services in the community. A peer navigator is [brief definition]."
